"cDNA cloning and mRNA distribution of a mouse very long-chain acyl-
COA synthetase.";
FEBS Lett. 425:305-309(1998).
-!- SUBCELLULAR LOCATION: Integral membrane protein. Peroxisomal.
-!- TISSUE SPECIFICITY: Strong expression in liver and kidney, low
expression in brain and testis, no expression in skeletal muscle
and spleen.
-!- SUMILARITY: Belongs to the ATP-dependent AMP-binding enzyme
family.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                SEQUENCE FROM N.A.
                                                                                                                                                                                                                                              FUNCTION: May be involved in long-chain fatty acids uptake, and thus may play a pivotal role in regulating their accessibility prior to metabolic utilization. May play an important role in uptake of these hydrophobic compounds under conditions where facid synthesis is compromised.

SUBCELLULAR LOCATION: Integral membrane protein (Potential). SIMILARITY: Belongs to the ATP-dependent AMP-binding enzyme family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             CCT-1994 (Rel. 30, Created)
